### Vertical Pipe Trims

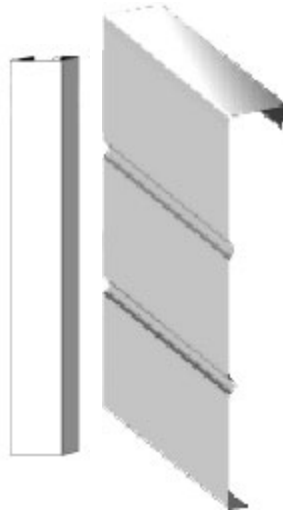

### Full Trim

Vertical pipe trims are used to over pipes from the floor to the Radiator.

PC-3 A three inch trim piece, color matched to the finish of the Radiator.

PC-10 A ten inch trim piece, color matched to the finish of the Radiator. The PC-10 may be cut in the field if a height between three and ten inches is desired.

Full trim covers are used to conceal side piping. These are available as center trims, left and right end caps and inside and outside corners.
