

Runtal Puzzle Featured at Museum of Arts & Design in NYC

The Museum of Arts & Design at 2 Columbus Circle is devoting a gallery to designs and trends in radiators. The curator of this exhibit is Karim Rashid, the famous industrial designer. One of the radiators featured is Runtal's new Puzzle radiator which was designed by the Swiss designer, Claudio Colucci. The Puzzle has won numerous awards throughout Europe and we plan to introduce it in America in 2010. The Runtal Puzzle is offered in 23 models: 5 symmetrical and 18 asymmetrical.

The exhibit runs between March 3 and May 17.
