

## Fain

The solid stainless steel Runtal Fain is quintessential minimalism integrating square and round elements. It goes well with either classical or contemporary decors. Available electrically in either direct wire or plug-in, the Runtal Fain has a state-of-the-art five setting digital control (off / lo / med / hi / 3 hour timer). For scheduling on/off times the [Omnipanel Programmable Controller](#) may be added.

Because it is made of stainless steel construction the Fain is the one Runtal product that can operate on both a closed-loop and open (domestic) system. For [Hydronic Controls Click Here](#).
